Student: Arfaz Hossain	**Instructor:** Muhammad Awais	**Assignment:** HW-7 [Sections 10.7 & 10.8]
Date: 03/14/22	**Course:** Math 101 A04 Spring 2022	

5. Consider the series $\sum_{n=0}^{\infty} \frac{22^n x^n}{n!}$.

(a) Find the series' radius and interval of convergence.
(b) For what values of x does the series converge absolutely?
(c) For what values of x does the series converge conditionally?

(a) Find the interval of convergence.

$-\infty$ < x < ∞ (Simplify your answers.)

Find the radius of convergence.

R = ∞ (Simplify your answer.)

(b) For what values of x does the series converge absolutely?

$-\infty$ < x < ∞ (Simplify your answers.)

(c) For what values of x does the series converge conditionally? Select the correct choice below and, if necessary, fill in the answer box to complete your choice.

- **A.** The series converges conditionally at x = . (Use a comma to separate answers as needed.)
- **B.** The series does not converge conditionally.
