	Innovation	0	
Total Points for Additional Use of Spaces		22	34

Total Earned Points	508
Total Available Points	737
Final Rating Score	69%

Congratulations on receiving your Rick Hansen Foundation Accessibility Certification™ rating results!

This Scorecard provides a breakdown of your site’s current level of meaningful accessibility based upon points awarded by an RHFAC Professional.

It is a snapshot of the current holistic accessibility of your site, for the purpose of determining your RHFAC certification level.

When reviewing your RHFAC Rating Scorecard:

1. Find your final rating score and the certification level your site has achieved.

Your site’s RHFAC certification level is determined by the following criteria:

Rating Score	Certification Level
80%+	RHF Accessibility Certified Gold Site follows best practices in meaningful access and has achieved at least 80% on the RHFAC Rating Survey.
60% - 79%	RHF Accessibility Certified Site follows best practices in meaningful access and has achieved at least 60% on the RHFAC Rating Survey.
Below 60%	Not Certified Site does not meet requirements of the RHFAC Program.

Condition: To become certified, a site **must** have a public entrance, and all its key functional spaces and amenities, can be physically accessed by everyone.

2. Follow the breakdown for each category to identify key areas of strength and/or improvement.

The RHFAC Rating Scorecard outlines points received for each category and its elements within the rating survey. Comparing earned to available points and reviewing your key areas of improvement from your RHFAC Professional will reveal where you can improve meaningful access.

3. Plan for next steps.

If you have achieved an RHFAC certification level, you have the option of publically listing your site on the online RHFAC Registry hosted by CSA Group. You may also choose to purchase window decals or a plaque from CSA Group to physically celebrate and showcase your achievement. We hope that you will celebrate and highlight your achievement to let Canadians know of your commitment and inspire other organizations to do the same.

If you didn't achieve certification, your Rating Scorecard is a starting point in determining areas where you can improve your accessibility. For more detailed recommendations on how to improve and next steps we recommend that you consult with an accessibility expert.

With your help, together we can create a Canada that's truly accessible and inclusive of people of all abilities!

About the RHFAC Program

Rick Hansen Foundation Accessibility Certification™ (RHFAC) is a unique, LEED-style rating system that evaluates the level of meaningful access of buildings and sites, and recognizes an organization's commitment to accessibility through certification.
